Introduction

Thank you for purchasing MAGNER175V/175FF.

MAGNER175V/175FF is smart, practical multi-currencies fitness sorter.

MAGNER175V/175FF sorts holes, tears, dog-ears, tape, soil, stains, folded and de-inked banknotes with high speed.

The machine is designed for user's convenience, optimized for high performance and easy maintenance.

MAGNER175V/175FF has high connectivity interfaces and 7" full color graphic LCD display.

For Safety Use

In this section, the compliance matters are described in order to use the product safely, and to prevent you and other people from the damages brought by the product to the human bodies or properties.

Please read this instruction manual thoroughly in advance to use in the correct way.

Marning

It denotes the contents in which mishandling of the product by neglecting this indication may cause the people's serious injury.

It denotes the contents in which mishandling of the product by neglecting this indication may cause the people's light injury or only physical damage.

Warning

Installation

1. At installation and relocation of the products, please contact our distributor near you or our designated dealers. If installation is not perfect, there is a risk of a falling accident, electric shock, fire and burn injury.

2. At installation and use of the products, keep the space sufficient for opening and closing the door, cover and operation. If a part of the product touches a human body, it may cause an accident.

3. In case of installing the product at the following places, you should confirm the Road Law, Road Traffic Law and Fire Protection Law, etc. If compliance conditions are not clear, please consult with the authorities concerned.

- The place which may disturb traffic or accident prevention.

- The place adjacent to the fire extinguishing and detecting apparatus.
- The place adjacent to the road signs or traffic signals.
- The place where combustible materials or gas are treated (gas stations, etc.)

Passages and facilities for evacuation Illegal installation may cause an accident.

4. Keep an installation space as described in the instruction manual, and do not choke up the ventilation inlet. If the ventilation inlet is choked, heat is accumulated inside and it may cause fire.

5. Depending on the installation place, mounting of an earth leakage breaker is required by Electricity Enterprises Law. Illegal installation may cause an accident.

1. Do not install the product at the place where water may spill on it. If water enters into the product, insulation performance degrades and it may cause fire and/or electric shock.

2. Do not install the product at the place where the floor cannot bear the load of the product, or at the unstable place with inclination and/or irregularity. It may cause the accidents of floor caving and sudden move of the product.

3. Installation at the following places should be avoided.

There are safety problems and deterioration of the product may be accelerated, which leads to a cause of failure.

- 1m or less from volatile combustible materials or curtains.
- 1m or less from heating apparatus such as stoves, heaters etc.
- The place with direct winds blown from air conditioners, ventilating openings etc.

- The place with high temperature, high humidity, or low temperature.
- The place with direct sunlight.
- The place with much dust.

When installing the product at the following places, please contact our distributor near you or our designated dealers.

- The place exposed to salty winds or corrosive gas.
- The place with much swinging or vibration.

Grounding work should be made for safety and prevention of static electricity and noise failure. In addition, a ground wire should be installed independently without sharing the wire with other products. At grounding work, please be sure to contact our distributor near you or our designated dealers. In case of electrical leakage when grounding is insufficient or not connected, it may cause fire and/or electric shock.

The place where a ground wire can be fitted:

- Ground terminals for power receptacle.
- The copper piece etc. with a length of 65 cm or more, buried in the ground.
- The ground terminals on which grounding work is made.

The place where is a ground wire must not be fitted.

- Gas pipes
- Telephone wires for exclusive use
- Lightning rods
- Water pipes or faucets with plastic materials at their intermediate part.

Do not use or put the combustible materials such as thinner, combustible gas, or a high-volatile object around/inside the product. Otherwise, it may cause explosion and/or fire due to heating from the product or flashing from power supply.

```
Warning
```

Power Supply

1. When using the product, connect it to the power supply specified in the instruction manual. If it is connected to the power supply, other than the product's specification, it may become a cause of fire, electric shock, and/or electrical leakage.

2. Do not use a power supply cord and the plug other than the attached ones. If a current that exceeds the rating flows in the power supply cord, it may cause fire.

3. Be sure to insert the blade part of the power supply plug into an outlet. Insufficient insertion may cause fire.

1. When the earth leakage breaker frequently operates, please contact our distributor near you or our designated dealers. If the product is used or left as it is, it may cause fire and/or electric shock.

2. Do not modify, process, or repair the power supply cord and the plug. In addition, do not convert a 3-prong power supply plug into a two-pole type. Grounding becomes insufficient and there may cause electric shock.

Please follow the items below to prevent electric shock and/or fire due to damage of the power supply cord.

- Do not pull the cord part when pulling out the power supply plug.
- Do not put anything on the cord part.
- Do not pass the cord near a source of heat.
- Do not bend or pinch the cord.
- Do not tread or twist the cord.
- Do not spill chemicals on the cord.
- Do not use it while it is bundled.
- Do not fix it with a stapler etc.

1. Do not use the power supply cord and the plug for other products or purposes. Further, when they are lost or damaged, please purchase them at our distributor near you or our designated dealers. The attached power supply cord and the plug are designed and confirmed the safety for connecting to this product to use. If they are used for other products or purposes, it may cause fire and/or electric shock.

2. The product should be used at the specified frequency. If it is used at other than the specified frequency, it may cause an accident.

Caution

Handling

1. The product should be used under the environment specified in the instruction manual. If it is used under the other environment of the specification, there may cause fie and electric shock.

2. When operating inside the product for error or clearing or cleaning etc., the operation should be made in accordance with the description in the instruction manual. Operation other than the description may cause an accident.

1. Do not turn off the power, pull out the power supply plug, or open the cover of the product during the operation. Otherwise, it may cause an accident.

2. Do not put a vase or glass with an object and/or water etc. on the product. Otherwise, it may cause fire, electric shock, and/or injury by spilling water or dropping.

3. Do not apply shock on the product. There is a risk of damaging the product and normal operation cannot be performed.

4. Do not use chemicals such as thinner or benzene when removing dirt of the product. Otherwise, it may cause damages.

5. Do not use a interface cable other than the attached one. When cables are other than the attachment, it may cause the interface error or machine trouble.

Do not us a combustible spray etc. around product. If spray gas etc. contacts the electrical parts inside the product, it may cause explosion and fire.

1. When touching inside the product for cleaning or parts replacement etc., be sure to turn off the power. If you work with turning the power on, it may cause electric shock and/or injury.

2. Do not touch the product and power supply plug and cord with a wet hand. There is a risk of electric shock.

3. The electrical parts inside the product should not get wet by rain or water at cleaning etc. if they get wet, it may cause electric shock and/or shock.

4. Do not turn of air heating suddenly when the product is completely cold. Moisture may adhere inside the product due to sudden air heating and it may cause electric shock. 5. There is a charging part inside. Be sure to open the cover with turning off the power. If the cover is opened without turning off the power, it may cause electric shock.

1. Do not drop any metallic piece such as a clip, staple etc. inside or in a clearance of the product. If a metallic piece drops inside the product and contacts the electric circuit, it may cause fire.

2. When the product is not use for a long time, be sure to pull out the power supply plug from an outlet for safety. Otherwise, it may cause heating and/or firing due to dust accumulation.

Do not modify the product or mount modified parts on the product. Further, do not dismount the portion which is not indicated to be opened/closed in the manual, or the cover and parts etc. fixed with screws etc. Otherwise, it may cause fire, electric shock, and/or injury.

Do not approach your hand or cloths during operation to moving parts of the product reachable. There may cause injury and/or pinching of a finger.
 When closing a door, pay attention not to pinch a finger. It may cause of injury.
 When working with a door opened, confirm it is locked. It may become a cause of injury because the door may suddenly close.

Do not touch the gear etc. It may cause injury.

Maintenance

For repairing the product, please contact our distributor near you or our designated dealers. Insufficient repair may cause fire, electric shock, and/or injury.
 When the product has sunk under the water due to a disaster etc., stop using it and please ask for repair/check to our distributor near you or our designated dealers. If used as it is, it may cause fire and/or electric shock.

3. Check periodically whether its installation place is unstable or not. If there is any abnormality, please contact our distributor near you or our designated dealers. If it is continuously used with insufficient installation, it may cause a falling accident.

4. Check and clean the power supply plug and the cord regularly. It the power supply plug is broken or the cord is damaged, stop using and please replace it by contacting our distributor near you or our designated dealers. It may cause fire and/or electric shock.

When smoke, abnormal smell, or abnormal sound is generated from the product, stop using it immediately, cut off power supply and pull out the plug from the outlet. Then, please contact our distributor near you or our designated dealers. It used or left as it is, it may cause fire and/or electric shock.

• Barcode (Russia only)

• You can connect Barcode Reader to MAGNER175V/175FF via USB port.

Press "7" key and scan Barcode.

When you press "9" key, the scanned barcode is printed with counting result.

• Save USB

After select operation mode, if press "8" key, counting result is saved to USB stick.

• Print

When press "9" key, print the counting result via Printer.

Reject

When press "0" key, you can check the reason of the rejected notes.

No	Code	Detail Reason [01 / 01]
1	E 2309	Value Error

3. Operation Mode 1

3-1. ATM - Sorts very clean notes. (Magner175FF Only)

3-2. FIT – Sort clean notes by fitness standards. (Magner175FF Only)

3-3. VALUE – Count notes normally.

4. Operation Mode 2

4-1. GT - When GT function is on, machine settles accounts before user clears the accounts.

VALUE[MIX] TAPE UV MG IR	< DIR : Face < Image : Se	> < Ve rial >	er:ON>	GT OFF
EUR			0	ADD OFF

13. Maintenance

13-1. Sensor Structure

13-2. Daily Cleaning

The machine has many sensitive sensors to perform high technology functions, for example fitness sorting, detecting counterfeit detection, recognizing denominations, etc. Users are recommended to clean the machine sensors at least once a day. Refer to following section and clean the machine regularly. Wipe with a cloth and/or can air.

***** Turn the power off before cleaning the machine.
