Important Safety Instructions

- A.** Read and understand all of the safety instructions.
- B.** Follow all warnings and instructions marked on the unit
- C.** This product should never be placed near or over a radiator or heater register. This product should not be placed in a built-in installation unless proper ventilation is provided.
- D.** This product should be operated only from the type of power source indicated in this User Manual. If you are not sure of the type of power supply in your location, consult your dealer or local power company.
- E.** Never push objects of any kind into the unit through the case slots or openings, since they may touch dangerous voltage points or shortcut parts, resulting in a risk of fire or electric shock.
- F.** Never spill liquids of any kind on the product.
- G.** Unplug this product from the wall outlet and refer to servicing by qualified service personnel under the following conditions
 - G-1 When the power supply cord or plug is damaged or frayed
 - G-2 If liquid has been spilled into the unit.
 - G-3 If the unit has been exposed to rain or water.
 - G-4 If the unit does not operate normally while following the operating instructions,
 - a. Adjust only those controls that are covered by the operating instructions.

b. Improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to normal operation.

G-5 If the product has been dropped or the case has been damaged.

G-6 If the product shows a noticeable change in it's performance.

(1) Introduction

The machine is a desktop banknote strapping machine designed for heavy use where high case volume operations are required such as Banks, Vaults, ATM processing, Casinos etc. Easy to use, fast, clean and very reliable are some features this unit meets, making easier subsequent cash handling operations like currency denomination identification, transporting and currency storage procedures all of these required in all financial institutions.

(2) Box Content

When opening the box, verify all of the items described below are included. If any of them is damaged or missing, contact the place where the unit was purchased. 1. Strapping Machine 2. Strapping paper roll:20mm*150m(inside the unit) 3. Power Cord 4. User Manual and other documents

(3) Before Starting

(3-1) General Description

- 1. Handle
- 2. Strapping Position Adjustment Knob
- 3. Control Panel
- 4. Bundle Strapping Slot
- 5. Front Cover

6. Roll Paper Receptacle

7. Paper Guiders

8. Feed In/Feed Out Paper

9. Feed In/Out Paper Slot

10. Power Cable Connector

11. Power Switch

(3-2) Control Panel Description

1. LED Display: is used to show the exact numbers of bundles have been strapped. Also show the temperature value during the temperature adjustment procedure.

2. “Clear” Button: used to reset the counting of bundles to “0”

3. “TEMP” Temperature Button: pressing here the current temperature’s value will be shown on the LED Display

4. +/- Buttons

a) Are used for setting up any specific number of bundles on the LED Display.

b) Are used for setting up or readjust(increase or decrease) the strapping temperature value.

(3-3) Display Description

1. Bundle Counting Indicator: shows the current quantity of bundle are being strapped. Pressing “+” or “-” keys the user can adjust the number conveniently. Pressing “Clear” key can reset the Current number to “0”

2. Temperature Indicator: pressing “TEMP” key the current temperature value will be shown on the display. Pressing “+” or “-” keys the user can adjust the temperature value conveniently.

3. Error Codes: In case any functional error occurs, the unit will show an error code on the display. Is recommended the user refers to the Troubleshooting section to solve the problem.

(4) Operation Procedures

(4-1) Paper Roll Loading Procedure

1. Make sure the unit is turned OFF
2. Open the unit's front cover pulling it toward you (fig 1).

3. Push down the roll paper holder mechanism
4. Get the paper roll into the receptacle and push up the holder mechanism (fig 2)

5. Pull out the paper roll tip and place it through the paper tape guiders
6. Turn the unit ON
7. Pull the paper tip out until you have about 8" paper tape long. Hold the paper tip slightly and feed it into the Feed IN/OUT paper slot, and press the IN button

(red one) simultaneously. The paper will be fed automatically into the strapping track.(fig 3 and fig 4)

8. Close the unit's front cover

9. Take a bundle of bills and strap it in order to confirm the unit is working properly. Note: Ensuring a correct paper tape positioning through the guiders is very important to obtain a Good unit's performance, that why is highly recommended to DO IT Exactly as the figure shows, keeping facing down the sticky side.

1. Cutting straight the paper tape tip edge (with scissor) before loading into the machine, will ensure a smooth and a free-errors loading.

2. In case a paper jamming event take place, press the Feed OUT button and the paper tape will come out from the strapping track.

3. Cut the paper tape if it is damaged and proceed to feed it again.

(4-2) Paper Roll Replacement Warning

1. In case during your strapping intent the paper band is not present, and the Paper tape becomes indicated red, that means the paper roll run out.

(6) Maintenance In order to ensure a safety unit manipulation as well as to reduce the risk of electric shock and increase the unit's lifespan is highly recommended to follow these instructions

1. Make sure the wall power outlet has "ground" connection and the power cable must be the one provided with the unit.
2. Always hold the bundle by its corner end in order to avoid put your hand into the strapping slot.
3. Avoid use the unit into a dirty environment.
4. The protection fuse specifications are 3A/220V

(7) Specifications

1. Strapping time:2 sec/bundle
2. Preheat time: 0 sec
3. Variable strapping temperature range: 70°C - 150 °C (120 °C Value recommended)
4. Strapping Tape Width:20 mm
5. Paper Tape Roll size:20mm(W) x 150m(L)
6. Power source: AC 220V/50Hz
7. Power Consumption: Strapping Mode<70W, Stand by Mode<10W
8. Unit Weight: 8 kgs, Dimensions: 210x240x215(mm) (WxLxH)

(8) Attachment List

1. User Manual: 1 pc
2. Power Supply Cord: 1 pc
3. Paper Tape: 1 roll
4. Fuse: 2 pcs (3A/220V)
5. Cleaning Brush 1 pc
6. Tweezers: 1 pc
